

SUEWS Parameters for Vegetated surface (DecTr, EveTr, Grass)

LAI

Using MODIS to calculate:

- BaseT
- BaseTe
- GDDFull
- SDDFull
- LAIMAX
- LAIMin

Albedo

Using LAI parameters and
observations calculate:

- MaxAlbedo
- MinAlbedo

g1-g6

Using LAI and Albedo
parameters to fit g1-g6 for
each vegetated surface
